

Colegio Bicentenario España
Mrs. Patricia Embry Torres

- **Unit 2: My Reflections on Global Issues**
- **3rd A-B-C**

- OA3: Use their knowledge of English to understand and produce short and clear oral and written texts, in order to build a critical personal posture in contexts related to their interests and concerns.
- OA4: Produce and fluently understand short and clear oral and written texts in communicative situations that involve other worldviews and their own, in order to interact and become aware of their own identity.

Global Issues

*What is a
global issue?*

Global issues are problems that affect the whole world and have a large impact on the global community. Ten major issues have been identified, however, there are many more.

There are many global issues that threaten our world today such as...

lack of clean fresh water

lack of energy

lack of quality education

We can't solve global issues if we don't know of their existence which is why it is important to inform today's students about global issues.

"Teaching children about global issues and encouraging them to see the world through other eyes is of huge importance"
- The Guardian

Globalization

Globalization is the spread of an idea, a company, a concept, cultures, and value throughout the international community. It is the interconnectivity of the nations of the world.

*"Globalization is a process of interaction and integration among the people, companies, and governments of different nations, a process driven by international trade and investment and aided by information technology."
-Globalization 101*

**Globalization is the cause
of global issues, and is a
tool for preventing global
issues at the same time.**

Globalization has also lead to an increase in use of scarce resources like oil for example. This means that the world is currently using a large amount of finite resources. This is a large cause of global issues.

Globalization should be considered a dangerous tool that, in the right hands, will save us all.

HOW DO WE KEEP THE GOOD PARTS OF
GLOBALIZATION AND GET RID OF THE BAD
PARTS?

Besides globalization, what are the
other causes of global issues?

If everyone was educated on global
issues would we already have solved
them?

HOW DO WE SOLVE THE ISSUES?

Does everyone know what global issues
are?
